

Short Versions Promising Practices Wapato School District

Event: During/Extended Day Tutoring Program

Target: High school

Purpose: Provide work study tutors for reading and math classes to assist the students during class as well as in the extended day program.

Activity: Tutors will assist students with daily work and also provide mentorship throughout the school year by being a role model and discussing what it takes to prepare for post secondary education. The college tutors will be placed in classes that are in high need of tutoring support that focus on math and reading. Students will be monitored throughout the school year to maintain grade expectations and will be referred using various methods that can include their mentors, teachers, parents, as well as by recruitment.

Results: Students increased in test scores and or completing work in a timely fashion along with keeping up with the class in these core classes of math and reading.
